**SustainEUorPlanet:** The Project proposes an interdisciplinary and critical analysis of the EU's international policies and legal frameworks directed to economic and social fairness, respect for the environment, access to clean energy and essential goods, while looking for security to overcome geopolitical tensions and asymmetries. SustainEUorPlanet has a twofold purpose. On one side, it offers a set of activities envisaging the promotion of a ruling and academic class of excellence, involving EU, national and international civil servants, politicians, NGOs, local businesses and public administration. On the other side, SustainEUorPlanet shows the leading role of the EU as a global actor in constantly promoting a sustainable agenda for trade, environment, energy and climate policies, highlighting the importance of economic operators' accountability and the relevance that EU citizens can have in shaping and enforcing EU's external tools through participation and transparency. Likewise, the Project focuses on political security policies in world economy. More information available on the Project's [website](#) and on [LinkedIn](#).
